authordate.readme	**Remarks on David Rhead's authordate styles** This directory contains 4 BibTeX style files for producing author-date reference-lists. The styles are loosely based on the recommendations of British Standard 1629 (1976 edition), Butcher's "Copy-editing" (Cambridge University Press, 1981) and the Chicago Manual of Style (1982 edition). The files are: authordate1.bst - Author's names are typeset in roman. Uppercase letters in article, journal and book titles are left as given in the bib file. authordate2.bst - As authordate1, but with downstyle titles, i.e., titles that are lowercase except for the first letter, any letter> following a colon, and letters protected by { and }. authordate3.bst - As authordate1, but with author's names in small capitals. authordate4.bst - As authordate3, but with downstyle titles.
